READERS' WANTS

If any one is in the market for any engineering or supplies, the first thing to do is to refer to our advertisers, but if the buyer cannot find what he wants we particularly ask that he notify us at once and we will inform parties without cost to the inquirer. A copy of ENGINEERING NEWS BUYERS' GUIDE will be mailed upon application. This paper will always appreciate any news notes regarding public, or important private work, and will be pleased to receive detailed items. Requests to hold names will be complied with in every case. Do not fail to mention our advertisers or us.

TANK CARS.—Richmond, Va.—The Armitage Mfg. Co., 3300 Williamsburg Ave., is in the market for tank cars.

DRY-KILN.—St. Augustine, Fla.—Heth Canfield & Sons are reported as in the market for a 5,000 ft. capacity dry-kiln.

CONCRETE MIXERS, STEEL WHEELBARROWS, ETC.—South McAlester, Ind. T.—McEachin & Hiffle are in the market.

SAW MILL MACHINERY.—Waco, Tex.—The United Development Co., Angus McKinnon, Mgr., is in the market for lumber-cutting machinery, etc.

SAND-WASHING MACHINE.—Liverpool, Eng., Jos. Beausire & Co., 18 Water St., are in the market, we are informed, for a sand-washing machine.

GASOLINE HOISTING ENGINES, ETC.—Birmingham, Ala.—The Southern Construction Co., 204 Chalifonx Bldg., is in the market, according to reports.

SAND BLAST MACHINE.—Liverpool, Eng.—C. S. Grindler, 153 Westminster Road, Kirkdale, Liverpool, is in the market for a sand blast machine for glass and marble work.

LEAD PIPE, INDICATOR, ETC.—Richmond, Va.—G. A. Inman & Co., Times-Dispatch Bldg., is reported in the market for a 10-in. indicator, a 10-lb. float and 300 ft. of lead pipe.

ENGINE AND BOILER AND 10-TON ICE PLANT.—Mason, Tex.—Wm. Ellebracht is in the market for a 54 × 16 boiler and 12 × 36 engine, and will likely want a 12 × 36 Corliss engine later.

CHARCOAL AND CHARCOAL MAKING APPARATUS.—Worcester, Mass.—F. Morgan Aguirre writes us that he wants the addresses of the manufacturers of charcoal and charcoal making apparatus.

LANDSCAPE ARCHITECTS.—Canada.—We are informed that it is likely that the Grand Trunk Ry. System, Montreal, may soon wish to engage a landscape architect to plan the ground, etc., at the Pacific terminals.

BUILDING BLOCK MACHINES.—F. S. White, Box 130, Clarksburg, W. Va.; the Missouri Granite-Brick Co., A. V. Boswell, Mgr., Joplin, Mo.; Ivan E. Allen, of Atlanta, Ga., and W. T. Christopher, of Americus, Ga., are reported as in the market for cement building block machines, etc.

RAILWAY SUPPLIES.—Swannanoa, N. C. Tree R. R. is in the market for a mile of 56 rail, angle bars, bolts, etc., and W. L. Bra R. R., Augusta, is in the market for electric

PULLEY BORING AND TURNING MA inth, Miss.—The Corinth Engine & Boile Thos. Young, M. E., writes us that it is in for a machine that will bore and turn pul wheels from 3 to 10 ft. in diameter. J. E.

COAL-HANDLING MACHINERY, CONC ERS, HOISTING ENGINES, DERRICKS, TORS' TOOLS, ETC.—New York, N. Y.—T Engineering & Contracting Co., 29 Broadwa that it is in the market for the above-mention

CYLINDRICAL CONCRETE MIXER.—New —J. Edward Ogden Co., 147 Cedar St., writes in the market for a cylindrical concrete mixer, four-wheel truck, and when the truck is in mot the mixer so that by the time the truck reac the material is already mixed.

HEATING APPARATUS, BUILDING SUPPL —I. J. McKain, Mayor, Willepoint, Miss.; S Third and Washington Sts., Pulaski, Va.; the B trial School, Rome, Ga.; Young's Female Colle asville, Ga.; Z. V. Walse, Lexington, N. C. Simmons, of Hancock, Md., and J. G. Frederick Moss Sts., Lake Charles, La., are reported in the for various building supplies.

RUBBER BELT CONVEYOR.—South Africa Aktiengesellschaft für Feld-und Kleinbahnen-Bedarf formals Orenstein & Koppel, of Tempelhofer-Ufer 24, Berlin, S. W. 61, Germany, writes us that prices are wanted at once on furnishing a rubber belt conveyor. Prices must be quoted f. o. b. shipping port, and c. i. f. Delagoa Bay, P. E. A. Specifications and sketches may be seen at the office of Engineering News, New York.

SAND AND LIME BRICK.—De Leon, Tex.—Lowe & Troxell are reported as interested in the matter of sand and lime brick, and may be in the market for brick machinery, as will also J. O. Ragsdale, of Madison, N. C., and the Missouri Granite-Brick Co., A. V. Boswell, Gen. Mgr., of Joplin, Mo., who will also want prices on rock crushers, conveying machinery, building-block machinery, shafting, pulleys, ball mills, cars, rails, etc.

TRADE PUBLICATIONS.

(The standard sizes for pamphlets and trade catalogues recommended by all the principal engineering societies of the United States are: 3½ × 6 ins., 6 × 9 ins., and 9 × 12 ins.)

LUNCH BOXES.—F. W. Bird & Son, East Walpole, Mass. Illustrated folder; 3½ × 6 ins.

STEAM SHOVELS.—The Vulcan Iron Works Co., Toledo, O. Illustrated folder; 8¼ × 11 ins.

GROUND PUMP PLUNGERS.—The Allentown Rolling Mills, Allentown, Pa. Illustrated folder; 6 × 9½ ins.; pp. 4.

VENETIAN BLINDS.—Fritz & Goeldel Mfg. Co., Grand Rapids, Mich. Illustrated folder; 3 × 6 ins.; pp. 8.

Venetian blinds are illustrated and described, and price list given.

AIR COMPRESSORS.—Clayton Air Compressor Works, New York. 3½ x 6 ins.; pp. 32.

A few of the air compressors made by this company are illustrated and their merits set forth.

WIRE ROPE CAR HAULAGE.—The Jeffrey Mfg. Co., Columbus, Ohio. Illustrated folder; 8 × 10 ins.; pp. 6.

This folder shows photographs of a number of gravity inclines installed by this company.

GLASS TUBE CUTTER.—Alexander E. Hunt, Scranton, Pa. Card; 3½ × 5½ ins.

This tube cutter is meant for cutting gage glasses. It is illustrated and described, and price given.

AIR COMPRESSORS.—The Ingersoll-Sergeant Drill Co., New York. 5½ × 3¼ ins.; pp. 14.

A few of the different types of air compressors made by this company are illustrated and briefly described.

LATHE CHUCKS AND DRILL CHUCKS. — Westcott Chuck Co., Oneida, N. Y. 6 × 9 ins.; pp. 32.

Nine styles of lathe chucks and four styles of drill chucks are illustrated and described, price lists being given.

RIVET FORGES.—The Ingersoll-Sergeant Drill Co., 26 Cortlandt St., New York. 6 × 9 ins.; pp. 6.

This bulletin describes the MacDonald rivet forge, a cross-section of the forge being given to show its construction.

ALLOYS FOR BEARINGS.—The Buda Foundry & Mfg. Co., Railway Exchange Building, Chicago. 6 × 9 ins.; pp. 8.

The different bronzes and antifriction metals made by this company are described.

STEAM ENGINES.—A. L. Ide & Sons, Springfield, Ill. 6¼ × 9¼ ins.; pp. 15.

The "Ideal" steam engines manufactured by this company are illustrated in an interesting form. Tables of standard stock sizes of engines are given.

BUILDINGS.—Frank B. Gilbreth, Boston and New York. 8¼ × 7 ins.; pp. 15.

Photographs of a number of factories, laboratories, residences and other buildings erected by this firm are given, together with letters commending the work done by the firm, which makes a specialty of rapid building construction, doing the work on the basis of cost of construction plus a fixed sum for superintendence and use of plant.

"IDEAL POWER."—A monthly magazine devoted to ocmpressed air and electrical appliances. Ideal Power Publishing Co., 1508 Fisher Building, Chicago, Ill. 6 × 9 ins.

This magazine contains a number of short articles relating to pneumatic tools and their use.

INDUSTRIAL CARS.—John Turl's Sons, 234 West 28th St., New York. Illustrated folder; 9½ × 12 ins.; pp. 4.

This folder consists entirely of illustrations of the different types of industrial cars made by this company; also, dumping buckets, industrial railways, curves and switches.

TRENCH MACHINES.—The Carson Trench Machine Co., Boston, Mass. 9 × 6 ins.; pp. 30.

This catalogue contains a large number of very suggestive photographs showing the use of cableways and trench machines in various parts of the United States and in Canada.

"STEAM SHOVEL NEWS."—A magazine devoted to the interest of steam shovels and their work. 8 × 10½ ins.

This magazine contains a number of photographs and line drawings of Vulcan steam shovels, also interesting short articles relating to shovel work.

PIPE LINE SUPPLIES.—J. G. Pollard, Brooklyn, N. Y. 3¼ × 6½ ins.; pp. 12.

Lead furnaces and pots, calking hammer, jute packing, asbestos joint runners, sewer steps, light ditch derricks, and all supplies used in laying water pipe, are illustrated in this catalogue.

DUMP CARS.—Continental Car and Equipment Co., 17 Battery Place, New York. 9 × 6 ins.; pp. 23.

This catalogue treats of different types of dump cars suitable for contract work, photographs of the different cars being given, together with brief descriptions of dimensions, weights, etc.

DRAFTING TABLES AND CABINETS.—Fritz & Goeldel Mfg. Co., Grand Rapids, Mich. Illustrated folder; 3 × 6 ins.; pp. 12.

The different sizes and types of drafting tables are shown, and price lists given. Blue print frames and cabinets are also listed.

COALING STATIONS.—Mead-Morrison Mfg. Co., Boston and New York. 9 × 11 ins.; pp. 16.

Photographs of a number of large coaling plants installed by this company are shown, brief descriptive matter accompanying each photograph. Coal handling grab buckets are illustrated.

BRASS AND COPPER.—Waterbury Brass Co., Waterbury, Conn. 4 × 7 ins.; pp. 73.

Brass, copper and German silver, in sheets, rolls, plates, circles, wire rods, are listed in this catalogue. Tables of weights and gages are given. The tables showing weights of seamless brass tubes are particularly complete.

PILE DRIVING MACHINERY.—Vulcan Iron Works, Chicago, Ill. 5 × 6¾ ins.; pp. 40.

Various types of pile drivers are illustrated and described, also appliances to be used in connection with pile driving, such as pile shoes, pile bands and band pullers, timber clamps, pile followers, pile saws. Tables for safe bearing loads for piles, according to the Engineering News formula, are given.

"STEAM HEATING."—A paper by Reginald Pelham Bolton, C. E. and M. E. Published by Warren Webster & Co., Camden, N. J. 6¼ × 9¼ ins.; pp. 20.

This paper is a reprint of one of the papers read in 1897 before the American Society of Heating and Ventilating Engineers.

ELECTRIC PUMPS.—The Allentown Rolling Mills, Allentown, Pa. 6 × 9 ins.; pp. 48.

The advantages of electric pumping are set forth in this catalogue. The characteristics of the Aldrich electric pump are illustrated and described and pumps of different types and sizes are listed, tables being given of capacities, etc.

MANUFACTURERS OF METAL PARTS.—Pope Mfg. Co., Westfield, Mass. 3½ × 6¾ ins.; pp. 12.

This firm is prepared to manufacture multiple metal parts, such as screw machine products, stampings, drop forgings, special dies, tools, implements, etc. The company also does machining, enameling, brazing, polishing, laquering, case hardening and nickel plating.

VERTICAL MILLING MACHINES.—Newton Machine Tool Works, Philadelphia, Pa. 6 × 9 ins.; pp. 15.

This catalogue contains illustrations of a number of different designs of vertical milling machines, both belt and direct motor driven, which are made extra heavy, rigid and powerful to meet the demands of the locomotive and railroad machine shops for which they are specially adapted.

TRAVELING ELECTRIC HOISTS.—Pawling & Harnischfeger, Milwaukee, Wis. 10¾ x 7½ ins.; pp. 24.

Photographs of a large number of traveling electric hoists and cranes appear in this catalogue, brief data relating to each being given. One interesting photograph shows a wagon box, loaded with coal, being hoisted into the upper story of a building, then conveyed by the electric traveler to the bins.

WATER TOWERS, STANDPIPES, AND OTHER METAL STRUCTURES.—Chicago Bridge & Iron Works, Chicago, Ill. Stiff paper; 4½ × 7½ ins.; pp. 64.

Photographs of a large number of different water towers and standpipes installed by this company are given, with brief descriptions of the same. Useful hydraulic tables, and tables giving the strengths of riveted joints, appear in the back of the catalogue.

PIPE CUTTERS.—Ellis-Ford Pipe Cutter Co., Great Fall, Mont. 3½ × 6 ins.; pp. 12.

The Ellis system of pipe cutting is described, accompanied by illustrations of the cutter which was patented February 14, 1905. In cutting a pipe in a trench, all the room required is enough to pass the links carrying the cutter wheels underneath the pipe. This feature is especially valuable where the work is to be done in a rock trench.

SEPARATORS.—Harrison Safety Boiler Works, Philadelphia, Pa. 5¼ × 8½ ins.; pp. 128.

Cochrane separators are fully illustrated and described, tables being given of sizes, dimensions, etc. A long list of users appears at the end of the catalogue. The principal uses of the separators are for taking water out of live steam or purifying exhaust steam from cylinder oil, for removing oil, grit and moisture from ammonia currents, compressed air, etc.

TWO STEEL SPANS, ETC.

Greenwood, Ark.

Notice is hereby given that open competitive bids will be received at the West entrance to the Court House at Greenwood, Arkansas, on Monday, the first (1st) day of May A. D. 1905, at noon,

1. For furnishing all material and labor for erecting two steel spans of 56 feet each, and for erecting the same, to the bridge across James Fork, Sebastian, one mile south of Hackett City; and

2. For furnishing all material and labor for erecting one steel bridge, main span 80 feet and two approaches of 32 feet each, and for erecting the same across Vache Grasse creek on the Lavaca road, about 2 miles north of Greenwood;

both in Sebastian County, Arkansas.

Certified checks for $500 will be required before a bid will be considered from each bidder on each bridge, and successful bidder will execute a good bond for faithful performance of his contract.

Plans of the above work may be seen at the County Judge's office at Fort Smith, Ark.

U. S. ENGINEER OFFICE, New London, Conn., April 5, 1905.—Sealed proposals for furnishing 750 bbls. American Portland cement will be received here until 12 o'clock noon, April 15, 1905, and then publicly opened. Information furnished on application. CHAS. F. POWELL, Lt.-Col., Engrs. 15-1t

STEEL WATER TOWER.

Salem, Va.

Plans and specifications are now ready for constructing an all steel water tower for the Town of Salem, Va. The capacity of the tank to be 150,000 gallons and the height 100' from piers to the bottom of hemisphere, or 148' 3" from piers to top of the cylinder. The plans and specifications include:

(1) A detailed special design for the particular conditions, with all working drawings and complete specifications.

(2) A general design, with dimension drawings and complete specifications.

Requests for information must be accompanied by a check for $6.50, payable to the Engineer, to cover the cost of drawings and specifications, and must give information as to length of time applicant has been engaged in such work, facilities for the manufacture of steel water towers, and cuts or photographs, showing structures of similar character and size built by the applicant, and length of time required. From among the applications thus made a selection will be made of a number, whose experience and facilities seem to the Council of the Town of Salem to best fit them for the work. To these, copies of the detailed drawings and specifications will be sent, and the checks returned to others.

Those parties to whom drawings and specifications are thus sent are invited to bid on both designs, not later than May 1st, 1905.

The town of Salem reserves the right to reject any or all bids. Accompanying each bid a certified check for $500, payable to the Treasurer of the Town of Salem, must be sent, the same to be a forfeit in case the contract is not entered upon promptly after its award, and will be retained until the completion of the work to save the Town of Salem from loss or damage caused by nonfulfilment of the conditions of the contract.

STATE OF ILLINOIS }
COUNTY OF COOK } ss.
CITY OF CHICAGO. }

Public notice is hereby given that, pursuant to the resolution of the city council of the city of Chicago, duly passed on the thirteenth day of March, 1905 (council proceedings, p. 3052), proposals will be received for the construction and installation of a system of municipal street railways within the city of Chicago, upon the terms and conditions and the alternative plans hereinafter stated.

First. The said street railway system will first be installed upon the following named streets and parts of streets, to wit:

ADAMS STREET, from Clark street to Desplaines street;

DESPLAINES STREET, from Adams street to Harrison street;

HARRISON STREET, from Desplaines street to Western avenue;

WESTERN AVENUE, from Harrison street to Twelfth street;

TWELFTH STREET, from Western avenue to Crawford avenue.

It will be extended over the following streets and parts of streets, upon which the rights of the present occupants have already expired.

HALSTED STREET, from Harrison street south to the center of the Chicago river;

OGDEN AVENUE, from Harrison street to Fortieth avenue.

And will, at the pleasure of the city council, be extended into any and every other part of the city of Chicago, upon streets in which the rights of the present occupants have already expired or will expire during the years 1905 and 1906, and upon such other streets as may in the discretion of the city council be deemed advisable for making connected routes and lines of street railways.

Second. Payments to be made by the city shall be made either by the delivery of street railway certificates to be issued under and in accordance with the provisions of an act of the general assembly of Illinois, entitled "An Act to authorize cities to acquire, construct, own, operate and lease street railways, and to provide the means therefor," commonly known as the Mueller law, or in cash from the proceeds of the sale of such street railway certificates by the city, and separate bids may be submitted for payment by said certificates or for payment in cash from the proceeds of the sale thereof.

Third. Bids shall be separately submitted for the construction of tracks upon the streets specifically named above and for the installation thereon of all the necessary equipment for the operation of street railways. Said bids shall be submitted on the basis of a unit price per mile of track with overhead contact wire equipment, and a unit price per mile of track with underground electric conduit equipment, the construction in either case to be in accordance with the recommendations regarding such classes of construction in the "Report on the Chicago Transportation Problem," by Bion J. Arnold, 1902; the purpose being that the city council shall hereafter determine what part of the system above referred to shall be equipped with underground and what part with overhead appliances for electric propulsion, and reserves the right to itself furnish and distribute electric power to the system.

Fourth. Separate bids shall also be submitted for the construction and equipment of the necessary power house or power houses and distribution system and in accordance with plans and specifications to be furnished by the city.

Fifth. Separate bids shall also be submitted for the furnishing of not less than fifty nor more than three hundred and fifty cars of the double truck type, not less than forty feet in length over all, cross reversible back seats, center aisle, equipped with 4 30-HP. motors, air brakes, fenders, sand boxes, and all other devices for the safety and convenience of the traveling public, and separate bids shall also be submitted and based upon a unit price per car for snow plows, sweepers, repair cars, and work cars, to properly take care of the initial system and maintain it in first-class working condition.

Sixth. Detailed plans and specifications, with regard to all matters hereinabove referred to will be prepared by the city of Chicago and can be obtained from the Commissioner of Public Works on or after June 1, 1905.

Seventh. If bids are submitted upon the basis of payments by means of the delivery of street railway certificates secured in accordance with the provisions of the Mueller law aforesaid, such bids may be separately submitted on the basis that the city shall, itself, operate said system or systems by its own employes, or that the city will lease such system or systems to the highest and best bidder, at least one-half of the rental thus obtained to be and constitute a trust fund to provide additional security for the payment of said street railway certificates and the interest thereon.

Eighth. If the bidder or bidders so elect bids may be submitted upon the basis that the completed system when equipped and installed shall be so leased to such bidder, and in such case he shall submit with his bid the percentage of the gross receipts of the system, or the amount of cash per year and the term of years, not to exceed twenty, which shall be provided for in such lease, and in such case the person bidding the highest percentage of gross receipts, other things being equal, shall be considered the best bidder. In case of bids based upon percentages of gross receipts, other things being equal, the bidder who shall accept the lease for the shortest period of time shall be considered the best bidder.

Ninth. If proposals shall be submitted upon the basis of the lease of the system to the bidder, as provided for in paragraph 8 hereof, the lease to be prepared by the authority of the city council shall be in such form as the city council may ordain, and shall contain, among other things, the following provisions, in addition to those already expressed herein.

(1) That the operation of cars upon the whole of said system shall at all times be subject to the reasonable exercise of the police power of the city, to be expressed by resolution or ordinance of the city council or by the orders of such executive officer as the city council may for that purpose appoint, and that the exercise of the police power, as aforesaid, shall relate to all matters concerning the safety, health, comfort and convenience of the public.

(2) That the rate of fare upon said system shall be five cents for adults and three cents for children between the ages of seven and twelve years, children under seven years of age, if accompanied by an adult, shall be carried free.

(3) That the lessee and operator of said system shall exchange transfers with any other company in the city whose lines cross or come within a distance of two hundred feet of the lines of said lessee and operator, to the extent to which the city may be able to enforce the exchange of said transfers by and with such other companies.

(4) The city shall have the right to commute its compensation by the reduction of fares; provided, however, that such reduction of fares shall never be so exercised as to impair the accumulation of a trust fund for the payment of said street railway certificates at maturity, and interest thereon as the same accrues.

Tenth. Bids may also be submitted for the privilege of constructing and operating street railway tracks and a system of cars in the various streets herein referred to, and such other streets as the city may lawfully designate from time to time, and in such case the bidder who agrees to pay for such privilege the highest percentage of the gross receipts to be received from such operation for the shortest term, shall, other things being equal, be considered the highest bidder. In such case the bidder may specify the streets and parts of streets upon which he desires to bid.

Eleventh. Proposals are also invited by the city for the sale to the city of existing tracks, wires and equipment owned or claimed to be owned by the companies whose ordinance-rights in the streets above mentioned or in any part thereof have expired.

Twelfth. Possession of the streets specifically above named will not be given by the city of Chicago until after the decision by the Circuit court of the United States in and for the northern district of Illinois of the injunction suit therein pending in which is involved the question of the date when the ordinance-rights of the Chicago Passenger Railway company in the streets above named expire; nor until the date of expiration determined by the final decree in said cause.

Thirteenth. All bids will be delivered to the comptroller of the city of Chicago, on or before the first day of July, 1905, in sealed envelopes, with a certified check for $25,000.00, to be forfeited by the successful bidder to the city of Chicago, as liquidated damages, in case the bidder fails to execute the necessary contracts and leases hereinabove referred to, and to be returned to the respective unsuccessful bidders by the comptroller upon the awarding and execution of the contracts and leases as aforesaid.

Fourteenth. At 2 p. m. of the said first day of July, 1905, the comptroller shall open and tabulate said bids and present the same and the tabulated report thereof to the committee on local transportation of the city council, and said bids and report shall thereafter be forwarded by said committee, with its recommendations, to the city council at its next meeting, or as soon thereafter as possible. The city council will reserve the right to reject all bids or award its contract to the bidder or bidders whose proposal may in the opinion of the city council be the most advantageous to the interests of the city.

(Signed) CARTER H. HARRISON,
Mayor of the City of Chicago.
Chicago, March 30, 1905. 15-4t

OFFICE OF THE COMMISSIONERS OF THE DISTRICT OF COLUMBIA, Washington, D. C., April 8, 1905.—Sealed proposals will be received at this office until 12:00 o'clock noon, on the 28th day of April, 1905, and then opened, for the collection and disposal of ashes, garbage, dead animals, night soil and miscellaneous refuse, in the District of Columbia, for a period or periods not to extend beyond June 30, 1910, and commencing, for ashes, miscellaneous refuse and night soil on August 1, 1905; for garbage and dead animals on December 1, 1905. Specifications and blank forms for proposals, and other information on the subject, can be obtained on application therefor to the Superintendent of Street Cleaning of the District of Columbia. Only bids on such forms will be considered; and a receipt for three thousand dollars ($3,000) from the Collector of Taxes of the District of Columbia, or a certified check for said amount on some reliable bank, payable to the Collector of Taxes, D. C., must accompany each bid. The Commissioners reserve the right to reject any or all bids, or to make such selection of one or more as may, in their judgment, best secure the efficient performance of the work. Bids must be enclosed in a sealed envelope, on the outside of which must be endorsed "Proposals for the collection and disposal of ashes, garbage, etc." HENRY B. F. MACFARLAND, HENRY L. WEST, JOHN BIDDLE, Commissioners, D. C. 15-2t

CONSTRUCTING QUARTERMASTER'S OFFICE, Oswego, N. Y., April 12, 1905.—Sealed proposals in triplicate for furnishing the necessary labor and material required for a Water Distribution System at Fort Ontario, N. Y., and also for the labor and material for the construction of a Side-track, at Fort Ontario, N. Y., will be received at this office until 10.00 A. M., May 11, 1905, and then publicly opened. Plans, Specifications, and General Instructions to Bidders may be obtained at this office. Blanks for proposals and all necessary information will be furnished upon application. WATER-WORKS.

Waterville, Maine, April 15, 1905.

Sealed proposals, endorsed "Kennebec Water District Contract 20," for laying cast iron water pipe and appurtenances in Waterville, Winslow, Fairfield and Benton, for the Kennebec Water District, will be received at the office of its Engineer, Leonard Metcalf, 14 Beacon Street, Boston, Mass., up to Saturday, April 29th, at 10 a. m.

The approximate amount of work to be done is as follows:

Pipe laying, 560 feet 12-inch pipe over Waterville-Winslow bridge.
840 feet 8-inch pipe over Fairfield-Winslow bridge.
260 feet 10-inch pipe under Sebasticook River.
2,500 feet 16-inch pipe.
1,900 " 14-inch "
27,000 " 12-inch "
4,000 " 10-inch "
19,000 " 8-inch "
2,300 " 6-inch "
Taking up 15,000 feet old pipe.
Reconnecting 650 old services.
Rock excavation, 1,050 cubic yards.
Masonry, 50 cubic yards.

Bids will be compared upon the basis of the Engineer's estimate of work to be done, which is shown in greater detail in the printed form of contract and specifications.

Proposals for doing the work must be made in the printed pamphlets on "Contract 20" (which comprise the form of advertisement, proposal, contract and specifications, and bond) furnished for the purpose, and must be accompanied by certified check in the sum of five hundred dollars ($500), made payable to the "Kennebec Water District."

A bond in the sum of fifteen thousand dollars ($15,000) with a surety company, acceptable to the Trustees of the Kennebec Water District, as surety, will be required for the faithful performance of the contract.

Detailed plans of the work may be seen and printed form of contract and specifications may be obtained at the office of the Engineer 14 Beacon St., Boston, Mass., or at the office of the Kennebec Water District, 74 Main St. Waterville, Maine; and a copy of the specifications will also be on file (after April 19) at the office of "Engineering News," 220 Broadway, New York, and "Engineering Record," 114 Liberty St., New York.

Bids will be opened in public at the office of the Engineer, 14 Beacon St., Boston, Saturday morning, April 29th at 10 a. m., and it is hoped that contract may be awarded within ten days thereafter.

The right is reserved to the Kennebec Water District to reject any or all proposals, or to accept the one deemed for the best interest of the District.

"The Job but a Small One."

We are very much pleased with our ad. for bids on this work (for a bell tower). **While only eight bids were received, we have had inquiries from at least 25 firms, and the job but a small one.**

Edward C. Charlton, City Clerk, Bradford, Pa.

The Proposal Advertisement referred to occupied one inch in several late issues of ENGINEERING NEWS. Bids were received from eight responsible firms from Connecticut to Ohio, and the bids ranged from $1,200 to $1,900.

The best and most favorable bids for any kinds of construction work and engineering supplies can be secured *only by advertising in* ENGINEERING NEWS. Over 2,000 Proposal Advertisements from cities and counties alone were ordered inserted in ENGINEERING NEWS last year. *See that when you are asking for bids that the advertisement is ordered in* ENGINEERING NEWS.

It will save you money.
